Becoming the Power to Change Tomorrow

MEISEI

MEISEI & COMPANY, LTD.

Becoming the Power to Change Tomorrow

Since being founded in 1934 as a trading company selling general dyestuffs and industrial chemicals, MEISEI & COMPANY, LTD. has spent more than 9 0 years walking side by side with its business partners through the provision of consistently novel materials and technological information.

In recent times, political and economic conflict accompanying globalization coupled with the spread of the novel coronavirus (COVID -19) infection has caused society and economy as well as the lifestyles of people to change significantly across the globe. The environment that surrounds MEISEI & COMPANY is also becoming increasingly shrouded in uncertainty.

In such circumstances, based on our management philosophy of "contributing to society through reliable, high-quality services with a strong presence and highly transparent, sound management," we intend to continue providing products to our customers that are tailored to their needs.

As we head into the next century and from there into the next millennia, we want to be of help to our customers through one-stop offerings that only MEISEI & COMPANY can provide.
In these times when we are called upon to change, we want to become the power to change your tomorrow.

This encapsulates our sentiments here at MEISEI & COMPANY.

COMPANY PROFILE

Name	MEISEI & COMPANY, LTD.
Established	May 5, 1934
Location of Head Office	Shimbashi Tokyu Bldg. 12F 4-21-3, Shimbashi Minato-ku, Tokyo 105-0004 Japan

Our strength is our ability to go beyond the realm of a specialized trading company to give shape to the needs of customers and greater society based on the experience we have accumulated since our establishment in 1934 and the lightness of our footwork.

Please feel free to contact or consult with us.

We aim to engage in business that is trusted by our customers and contributes to society.

Chemical Products Business

We offer our own product lines and services.

As the core business of MEISEI & COMPANY since its founding, we provide synthetic resins, synthetic fibers and various other chemical products for diverse applications. In recent years, we have been expanding the handling of imported products from Europe and the United States while proactively conducting chemical product search activities in China and other markets. We endeavor to provide our own high value-added products in the chemicals industry, which continues to fluctuate alongside global conditions.

- Synthetic resin and synthetic fiber field
- Pharmaceutical and agricultural chemical field
- Paint and ink field
- Electronic material field
- Adhesive field
- Personal care field
- Paper manufacturing field

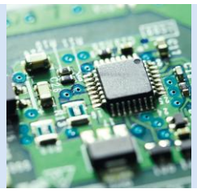

Electronic Solutions Business

We provide total solutions through product power and proposal capability.

We handle a wide range of products pertaining to electronics across our own domestic and overseas networks, from main materials such as raw materials, adhesives and electronic materials and process materials such as various films and stainless-steel fibers to processed and finished products that include mechanisms and electrical components. Through our wide-ranging product power in the electronics field and proposal capability through which we engage in the art of manufacturing together with all kinds of customers, we carry out "total solution-based sales" that address their problems and do our part to meet a myriad of needs.

- Printed circuit boards-related
- Semiconductor and electronic parts-related
- Electronic device films-related
- Metallic fiber materials and filters-related
- Resin raw materials, functional additives and auxiliaries-related
- Molds and equipment-related
- Electrical product mechanisms and processed and finished products for electrical equipment

Environment-Related Business

We provide total support from design to sales.

We propose and sell products related to renewable energy, mainly solar power generation systems. Our strength lies in our ability to provide one-stop proposals without depending on suppliers. In addition to renewable energy, we also develop and propose new products that meet the needs of the times.

- Solar power generation systems
- Solar battery-related products
- Renewable energy-related products
- New businesses

Overseas Business

We possess a global network that optimally addresses needs.

Leveraging our global network, we propose the procurement and sale of optimal products sourced from optimal locations to meet all kinds of customer needs from product development to delivery. We also meet our customers' quality requirements with our own quality management scheme and system for procurement.

- Home appliance-related mechanisms/ electrical components
- Industrial equipment-related mechanisms/ electrical components
- Finished product OEM
- Nursing care and welfare devices/equipment
- Healthcare-related equipment

SDGs DECLARATION

Having declared its support for the Sustainable Development Goals (SDGs), MEISEI & COMPANY, LTD. will continue to do its part for the realization of a sustainable society through its businesses.
